

Malaria

You will be advised if you need to take Malaria medication.

See the country concerned for specific drug recommendations.

Medication must be started prior to travel, continued for the whole time exposed to the malaria mosquito and for up to four weeks after.

Malaria Medication:

Chloroquine – *buy direct from Chemist*

Progyanil – *buy direct from Chemist*

Mefloquine / Doxycycline / Malarone
available only on private prescription from the practice nurse
